PROFESSIONAL SUMMARY

Senior Unity Developer with 5+ years of experience delivering client games and playable ads in a services-based environment, across Android, iOS, WebGL and PC. Specializes in scalable C# architecture (SOLID, design patterns, Zenject DI), gameplay programming, UI/UX and performance optimization, and builds HTML5 playable ads with Luna Playground for titles such as Scary Teacher 3D (100M+ downloads). Experienced in monetization (AdMob, IAP), REST API and Firebase integration, social login, leaderboards and cloud save.

TECHNICAL SKILLS

Game Development	Unity (2D & 3D), Gameplay Programming, UI/UX Systems, Animation, WebGL, Rapid Prototyping
Playable Ads	Luna Playground, HTML5 Playables, Unity Ads, AppLovin, Mintegral, Google Ads, End Cards
Programming	C#, .NET Core, OOP, Game Architecture, Design Patterns, SOLID, DRY, Zenject (DI)
SDKs & Services	Firebase, AdMob, Unity IAP, REST APIs, Social Login, Leaderboards, Cloud Save
Platforms & Tools	Android, iOS, WebGL, PC • Unity Profiler, Git, Agile/Scrum, Debugging & Testing

PROFESSIONAL EXPERIENCE

Software Engineer (Unity Game Developer)
Aug 2022 – Present

Geni-Team Solutions, Lahore

- Deliver end-to-end Unity games and playable ads for clients across puzzle, strategy, runner and casual genres.
- Translate client requirements into technical tasks, estimates and milestone builds; demo progress and act on feedback.
- Build HTML5 playable ads with Luna Playground for Unity Ads, AppLovin, Mintegral and Google campaigns.
- Architect modular, reusable codebases shared across projects, speeding up delivery of new client work.
- Integrate backend services and server APIs for authentication, leaderboards and cloud sync.

Game Developer
Mar 2021 – Jun 2022

Argon Tech, Lahore

- Implemented REST API communication with UnityWebRequest to handle server data in-game.
- Designed and developed performance-friendly game UI/UX.
- Debugged and improved game physics and gameplay mechanics for more stable, responsive play.

KEY PROJECTS

Playable Ads – *Luna Playground (HTML5) for Unity Ads, AppLovin, Mintegral & Google* — Geni-Team Solutions

- Built playable ads for titles with 110M+ combined Google Play downloads, including **Scary Teacher 3D** (100M+), **Idle Home Makeover** (10M+) and **Going Up Cat Runner 3D** (500K+).
- Turned core gameplay into short, focused loops with end cards and install CTAs, delivered per each network's specs.
- Optimized textures, audio and code to fit strict file-size limits while running smoothly in mobile browsers.

Sequence Samba – *Cross-Platform Puzzle Game (iOS & Android)* — Jul 2025 – Jan 2026

- Developed a cross-platform puzzle game with multiple game modes and progressive difficulty levels.
- Integrated Facebook, Google, Apple and Guest login, a player-ranking leaderboard, and rewarded/interstitial ads.
- Managed player data, progress and cloud synchronization; designed an intuitive, engaging UI/UX.

Cyera Endless – *Endless Runner (WebGL)* — Mar 2025 – Jun 2025

- Built core gameplay (movement, obstacles, scoring), optimized for smooth browser play, and shipped the WebGL build.

Reel Adventure – *Real-Time Strategy (RTS) Game* — Jan 2023 – Mar 2025

- Architected a scalable RTS codebase (SOLID, event-driven systems) with a stat-driven auto-battle system.

EDUCATION

BS Software Engineering – *Lahore Garrison University, Lahore* — Oct 2016 – Aug 2020
