Profile

Game Developer with 5 years of industry experience and a solid Computer Science background. Skilled in Unity and C#, with a strong ability to contribute across the full development cycle. Known for quick adaptation, teamwork, and problem-solving in dynamic environments.

WORK EXPERIENCE

Game Developer, Argon Tech, Lahore

Mar 2021 to Jun 2022

Implemented Unity Web Requests for handling API responses.

Designed and developed game UI/UX elements with optimized performance.

Debugged and improved game physics and mechanics.

Software Engineer, Geni-Team Solutions

Aug 2022 to Present

Developed and optimized gameplay features using Unity and C#.

Collaborated with cross-functional teams for sprint planning and execution.

Wrote modular, scalable, and reusable code for multiple game projects.

Integrated backend services and server APIs for seamless in-game functionalities.

TECHNICAL SKILLS

• Game Engines & Development: Unity (2D & 3D), UI/UX Systems, Animator & Animation System, WebGL Development, Fast Prototyping & Playable Builds,
• Programming & Scripting: C#, Object-Oriented Programming (OOP), Game Architecture Design, Design Patterns (Singleton, Factory,-Observer, etc.), SOLID Principles, DRY (Don’t Repeat Yourself), Zenject (DI Framework), .Net Core
• Tool & SDK: Firebase, AdMob, Rest API, Unity In-Apps
• Platforms: Android, |OS, Webgl, PC

PROJECTS

Reel Adventure

Geniteam-Solutions, Jan 2023 to Mar 2025

- Architected a scalable
- Maintainable RTS game using SOLID principles.
- Event-driven systems.
- Auto battling system.Attack deciding upon stats of players

Cyera Endles

Geniteam-Solutions, Mar 2025 to Jun 2025

- Implemented core game play mechanics (player movement, obstacles, scoring system)
- Designed and optimized game for smooth performance on web browsers
- Handled debugging, testing, and performance optimization
- Built and deployed the game for WebGL platform

Sequence Samba

Geniteam-Solutions, Jul 2025 to Jan 2026

- Developed a cross-platform puzzle game for iOS and Android using Unity
- Implemented multiple game modes with progressive difficulty levels
- Integrated login system (Facebook, Google, Apple, and Guest)
- Added leader-board system to track and display player rankings
- Integrated ads (rewarded and interstitial) for monetization
- Designed intuitive UI/UX for smooth and engaging game-play
- Managed game data, user progress, and cloud synchronization

EDUCATION

Lahore Garrison University, Lahore

Software Engineering, Oct 2016 to Aug 2020
